

Supporting a critical need

The last decade has demonstrated an overwhelming need to create a direct link between our nation's veterinary resources and local, state and national emergency management systems. Recent emergencies which required veterinary support included:

- 2000-2001: Foot and Mouth Disease outbreak in Great Britain.
- 2001-2002: Exotic Newcastle Disease Virus in United States poultry required 15,000 responders in five states.
- 2002: Colorado wildfires result in some of the largest evacuations in recent CO history.
- 2005: Gulf Coast hurricanes created catastrophic damage displacing hundreds of thousands of people and animals.
- 2007: California wildfires result in the evacuation of perhaps a million people along with their pets and livestock.

The threats of avian influenza, bioterrorism, catastrophic natural disasters, and emerging diseases necessitate a new era in our ability to address both animal health and public health needs during disasters.

Evacuated dogs arrive at midnight at Denver International Airport in October of 2005.

Involving the entire veterinary medical team

Mission: The Colorado Veterinary Medical Reserve Corps (CO VMRC) program provides veterinary professionals with the training and credentialing necessary to support animal health and public health emergency response.

The CO VMRC provides an opportunity for:

- **Veterinarians**
- **Veterinary technicians**
- **Students**
- **Veterinary support staff**

Program affiliation:

The CO VMRC is a **Medical Reserve Corps Unit**, affiliated with **the Office of the Surgeon General** and **Citizen Corps**. CO VMRC is allied with the Colorado State Animal Response Team (SART) program and is supported by a broad multi-agency partnership, including:

- CO Department of Agriculture
- CO Veterinary Medical Foundation
- Colorado State University
- CO Veterinary Medical Association
- CO Department of Public Health and Environment
- CO Association of Certified Veterinary Technicians
- CO Division of Emergency Management
- US Department of Agriculture

Benefits to participants

The Colorado Veterinary Medical Reserve Corps will provide substantial benefits to participants, including:

1. Training programs in:
 - Bio-defense, Zoonoses and emerging diseases
 - Emergency animal response, including sheltering, technical animal rescue and animal decontamination
 - General emergency management and response
 - Hazardous materials
 - Personal protective equipment
2. Opportunities and scholarships to attend state and national conferences
3. Credentialing
4. Networking and collaboration with Community Animal Response Team (CART) programs
5. Regular communications concerning issues and events related to animal and public health emergency issues
6. Opportunities to network with your peers in the CO VMRC and MRC programs across the state
7. Certificates of recognition suitable for display to your clients

"This is a responsibility we should aspire to!"

USDA National Animal Health Emergency Response Corps (NAHERC) Affiliation

CO VMRC members will be encouraged to sign up for the USDA NAHERC program. Through NAHERC, veterinarians and technicians can be mobilized to help address an emergency event in our nation and throughout the globe. NAHERC personnel are paid as USDA employees during mobilization.

Medical Reserve Corps

The mission of the Medical Reserve Corps (MRC) is to improve the health and safety of communities across the country by organizing and utilizing public health, medical and other volunteers.

CO VMRC members will be encouraged to also join the local MRC Unit (if present in your community). For more information, visit: <http://www.medicalreservecorps.gov>

Colorado Volunteer Mobilizer (CVM)

CO VMRC is also part of the Colorado Volunteer Mobilizer program of the Colorado Department of Public Health and Environment. CMV provides MRC Units with an online volunteer database for tracking and communicating with their volunteers. For more information, visit: <https://covolunteers.state.co.us/VolunteerMobilizer/>

Program Contacts
